-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 21, 23, 25, & 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Gilgen (6,156,361).

Gilgen discloses treating a nut with an anti-oxidant to increase the shelf life of the product. The soaked nut is then coated in a reduced pressure air environment and then exposed to nitrogen gas. The nuts are then removed from the nitrogen atmosphere allowed to dry. Claim 21 appears to differ from Gilgen in the recitation of the moisture content of the final product. But one of ordinary skill in the art would anticipate that the final nut product would be expected to have the same moisture content as the original nut product, especially when the nuts are subjected to the same environmental conditions.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gilgen (6,156,361).

Gilgen discloses treating a nut with an anti-oxidant to increase the shelf life of the product. The soaked nut is then coated in a reduced pressure air environment and then exposed to nitrogen gas. The nuts are then removed from the nitrogen atmosphere allowed to dry. Claim 21 appears to differ from Gilgen in the recitation of the moisture content of the final product. But one of ordinary skill in the art would expect that the final nut product would be expected to have the same moisture content as the original nut product, especially when the nuts are subjected to the same environmental conditions. Claims 22 & 24 appear to differ from the references the way that the nuts are coated with water. But no unobvious or unexpected result can be seen from the way the nuts are soaked in water. Further even though abrasion is not mentioned in the reference, one of ordinary skill in the art, observing nuts together in a shaking pan or

conveyer belt, would recognize that the nuts have an abrasive action against one another.

Claims 1-20 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
